IONSHIELD

ion technology

ION SHIELD

The application of the Ion-Shield technology to hand dryers is one of the most revolutionary developments in the industry in recent times. And Veltia is the first company to incorporate this technology. This technology not only improves the hygiene of hands' drying but it also acts as a cleaner and purifier of the air in the bathroom or the space where it is located.

With Ion-Shield, the dryer emits 20 million negative ions per cm³. These ions attract the particles of dirt and pollution. Then they stick together and fell down by the effect of gravity.

With this system, we clean the air of bacteria, mites, and bad odors, resulting in a cleaner and more pleasant environment.

HEPA FILTER

The HEPA filters H13 are composed of a mesh with a diameter of between 0.5 and 2 micrometers. This type of filter is designed to retain the smallest pollutants and particles, thereby improving the efficiency in the elimination of most of the contaminant residues. Veltia's H13 HEPA filters are positioned as one of the main and most effective air filters on the market thanks to its high efficiency and effectiveness in removing quickly up to 99.97% of polluting particles in suspension.

ZERO SMELL

ZeroSmell not only neutralizes bad odours within the surrounding area, but leaves a slight and pleasant fragrance which increases the user's experience and perception

ZeroSmell is an innovative product that can be used to remove bad odours. With the maximum level of efficiency in areas where bad smells are usually present in both domestic and professional environments.

Currently, there is no other product on the market as effective as ZeroSmell. Most other products are usually air fresheners that only cover the bad smell with perfumes. They claim to eliminate bad odours when they actually only cover them.

Electronic automatic hand dryer with stainless steel casing.
Minimum depth and matching design with the rest of the EVO range.

GENERAL CHARACTERISTICS	
Dimensions	298 x 276 x 100 mm 11 3/4" x 10 7/8" x 3 7/8"
Casing thickness	1,5 mm
Weight	4,5 Kg
Activation	Sensor
Voltage	220 - 240 V~
Frequency	50 - 60 Hz
Power	400 - 950 W
Power consumption	4,2 A
Electrical isolation	Class I
Index protection against ingress; dust and water	IPX1
HYGIENE	
HEPA filter	Optional
MOTOR / HEATING ELEMENT	
Power	400 W
Speed	35000 rpm
Type	Universal
Electrical protection	Safety heat limiter
Heating element	0 W - 550 W
BENEFITS	
Air temperature (20 °C ambient)	37 °C at 10 cm
Effective flow	1248 l/min
Airspeed	288 km/h
Estimated drying time	15 seconds
Noise level at 2 m	70 dbA
